

Why we love...

Indoor / Outdoor rugs

Take your **indoor style outdoors**. Outdoor rugs are the ultimate **multi-purpose rug** - rain and water don't bother them!

To help keep your rug *looking great*, follow our top care tips:

Did you know?

Suitable for outdoor spaces as well indoor spaces, you can use our indoor outdoor rugs all year round.

Rug & Roll

Our rugs are rolled to ensure they arrive safe and sound from our hands to your home. To flatten your new rug, reverse roll and leave in a warm room for 24 hours. This will help reduce any wrinkles from packing.

Snip Snip

If you find the odd loose thread, simply snip carefully with scissors – never pull.

Safety

Using your rug indoors? At Flair Rugs we always recommend an anti-slip is used to prevent your rug from slipping.

Rug Care

Dust and dirt are easy to clean from an indoor/outdoor rug, simply shake it out! Then vacuum with the nozzle attachment.

Spills

Don't worry, spills happen! When spills occur, use mild soap and rinse with a hose on both sides. Hang the rug or lay it out in the sun to dry.

Long term care

When the weather turns, why not find a new home for your outdoor rug indoors? From kitchens, to dining rooms, hallways and kids playrooms, this rug is the perfect all-rounder. Alternatively, you can roll, cover and store your rug and wait for sunnier days.

Rugs that bring everything, and everyone, *together*
