

Why we love...

Synthetic rugs (Polyester & Polypropylene)

Synthetic rugs are **durable**,
easy to care for and have
minimal shedding.

To help keep your rug *looking great*, follow our top care tips:

Did you know?

Synthetic fibres don't absorb stains or spills easily – the perfect family friendly rug. Some of our polypropylene rugs are perfect for both indoor and outdoor living.

Rug & Roll

Our rugs are rolled to ensure they arrive safe and sound from our hands to your home. To flatten your new rug, reverse roll and leave in a warm room for 24 hours. This will help reduce any wrinkles from packing.

Snip Snip

If you find the odd loose thread, simply snip carefully with scissors – never pull.

Safety

At Flair Rugs we always recommend an anti-slip is used to prevent your rug from slipping and to protect your floors.

Rug Care

Dust and dirt are easy to clean from a synthetic rug, simply shake it out! Then simply vacuum with the nozzle attachment.

Spills

Don't worry, spills happen! Act fast and blot liquid spills immediately. Spot clean as needed with a dampened white cloth only; press firmly around the spill to absorb as much as possible. If the stain remains use a mild detergent to blot the area or gently rub until the stain lifts.

Long term care

To keep your rug looking good as new, rotate every 3 months to ensure even fading and wear.

Rugs that bring everything, and everyone, together
