

Why we love...

# Faux Fur rugs

A **fluffy soft pile** with a **realistic texture**, Faux Fur rugs are a treat for any feet.

To help keep your rug *looking great*, follow our top care tips:

## Did you know?

Crafted from soft acrylic yarns, Faux fur rugs offer the softness of real fur. Perfect for adding luxury and cosiness to any home.

## Rug & Roll

Our rugs are rolled to ensure they arrive safe and sound from our hands to your home. To flatten your new rug, reverse roll and leave in a warm room for 24 hours. This will help reduce any wrinkles from packing.

## Snip Snip

If you find the odd loose thread, simply snip carefully with scissors – never pull.

## Safety

At Flair Rugs we always recommend an anti-slip is used to prevent your rug from slipping and to protect your floors.

## Rug Care

Dust and dirt are easy to clean from a faux fur rug, simply shake it out! Then vacuum with the nozzle attachment.

## Spills

Don't worry, spills happen! Spot clean spills as soon as possible using a clean cloth (no rubbing!) Stubborn spill? Sprinkle dry shampoo onto the rug, let it sit for a couple of hours then vacuum or shake.

## Long term care

To keep your rug looking good as new, rotate every 3 months to ensure even fading and wear.

Rugs that bring everything, and everyone, together
