

Guide for wall light up mirrors – Warnings, fixing and care.

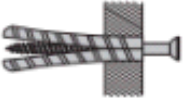

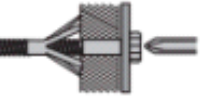

IMPORTANT
KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE

- ⚠ Wall fixings are not provided with this product as different wall types require different screws and wall plugs. See table below as a guide.
- ⚠ Make sure the screws and wall plugs used are suitable for the wall type and can support the weight of the product. Consult a qualified tradesperson if unsure.
- ⚠ Before drilling into walls, always check there are no hidden wires or pipes behind.
- ⚠ We recommend 2 people install heavy products.
- ⚠ MIRRORS: Potential Fire Hazard. Keep out of direct sunlight.

- WARNING**
- Do not use wire or string to hang this product as this may weaken the hanging hooks and cause damage to the frame.
 - Handle with care.
 - Do not place very hot or very cold items directly on glass surfaces.
 - Do not sit or stand on glass surfaces.
 - Do not strike the glass with hard or pointed items or use the glass as a chopping surface.
 - Do not use abrasives cleaning agents, as these may scratch the glass.
 - Always supervise young children around glass products.
 - Only use the hanging hooks provided on the back of the product. Do not attach additional hooks as these may not have been designed to hold the weight of the product.
 - If the glass is chipped or broken, stop using the product.
 - Do not install this product outside, unless the product specifies otherwise, as this may cause the product to warp and become damaged.
 - Not recommended to be positioned overheat sources such as radiators.

Fixing

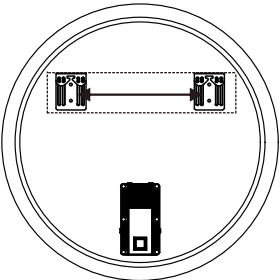

- Wall fixings are not provided with this product as different wall types require different screws and wall plugs. See table below as a guide only. Consult a qualified tradesperson if unsure.
- Before drilling into walls, always check there are no hidden wires or pipes behind.
- Ensure you use the recommended drill bit to match the required hole size for the wall plug. Wall plugs must fit tightly into the drilled hole.
- Ensure you drill into the wall horizontally, do not force the drill or enlarge the hole.
- Take extra care when drilling high walls and ceilings.
- It is recommended screws are attached above or below ceramic tiles to avoid cracking.

Wall Type	General wall material	Aerated / Breeze block	Plasterboard, partitions or hollow wooden doors	Concrete block or brick wall stuck with plaster
Light Load	 Standard Wall Plug	 General Purpose Wall Plug	 Cavity Fixing Wall Plug	 Hammer Fixing Wall Plug
Heavy Load		 Shield Anchor Wall Plug	 Cavity Fixing Heavy Duty Wall Plug	 Hammer Fixing Wall Plug

Marking accurate screw positions

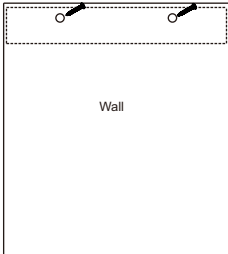

Step 1:

Cut a length of masking tape to the width of the product. Stick the masking tape across the hanging hooks and mark hook positions. Remove the masking tape and now it can be used as a template for screw positions.

Step 2:

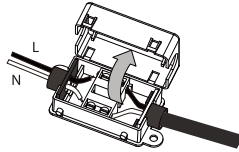

Position the masking tape on the wall where you'd like the product to hang. Consider the hook position from the top of the product to ensure height will be as desired. Use a spirit level to check the markings are level and fix the screws and wall plugs as required. Check the fixings are secure and hang.

Waterproof junction box

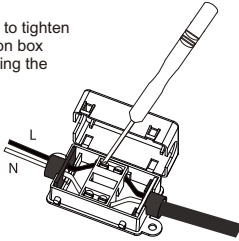

Step 1:

Open the waterproof junction box and connect the reserved wires at home separately (brown or red wire connected to L, blue or black wire connected to N).

Step 2:

Use a small flat screwdriver to tighten the screws, close the junction box cover and fasten it, completing the wire connection.

Care and maintenance

- We recommend the product is checked periodically to ensure the fittings and fixings haven't loosened and the products hasn't got damaged. Immediately stop using if any issues are found.
- Clean with a damp cloth. Use only water/glass cleaner.

Instructions

Touch Function:

- ON/OFF: Quickly touch the ON/OFF button to turn on the light.
- Quick Touch: On Warm Light - Day Light - Light off.

Press and Hold - Dimming

- First press and hold: Dims down to 10% (Min) and stops or until user stops pressing.
