Small Sideboard

Assembly & Care Instructions

Dear Customer

- Please keep these instructions for future reference.
- This item is intended for indoor use only - unless otherwise specified. Avoid exposure to humid conditions.
- Check all parts are intact and undamaged. Any issues please contact our customer service team.
- Restrain children from climbing or playing on or around the product. Always consider where products are positioned to ensure children cannot get access to long cords or windows.
- Some products will be supplied with anti - tip kits which should always be used to secure the product to the wall and prevent tipping.
- Keep all plastic wrapping materials away from babies and children to avoid danger of suffocation.
- Ensure that all packaging is disposed of carefully and responsibly. Please recycle where possible.

WARNING! Tipping hazard

Unanchored products can tip over which can lead to serious or fatal crushing injuries. We therefore recommend anchoring this product to the wall using the enclosed anti-tip kit.

The anti-tip kit has been provided for your safety.

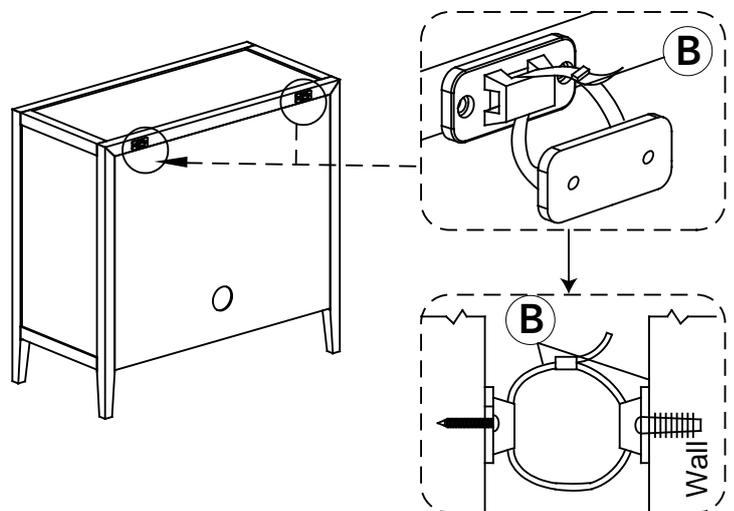

IMPORTANT - Keep these instructions for future reference

- This product is supplied with an anti-tip kit which must be fitted to prevent tipping. This has been provided for your safety.
- Never leave a child unattended around the product.
- Never allow children to climb, hang or pull at the product.
- If in doubt, please consult a qualified tradesperson to properly fit the anti-tip kit.
- Wall fixings are not provided with the anti-tip kit as different wall types require different screws and wall plugs. See wall fixing guide within this document for guidance.
- Make sure the screws and wall plugs used are suitable for your wall type and that they can support the weight of the product. Consult a qualified tradesperson if unsure.
- Before drilling into walls, always check there are no hidden wires or pipes behind.
- We recommend 2 people install heavy products.

Fixing the anti-tip kit

Plastic Cable Tie

- Position the product where desired. Looking at the plastic bracket on the back of the product, mark appropriate positions for the plastic wall brackets to be fixed, bearing in mind the length of the cable ties. When happy, screw the plastic bracket to the wall using appropriate wall screws and plugs for your wall type.
- Attach the cable tie through the product bracket and wall bracket. Ensure the plastic tie is securely fastened and the product is held in place. Do not continue to use the product if the cable tie does not secure properly.
- The product will now be secured to the wall to prevent tipping.

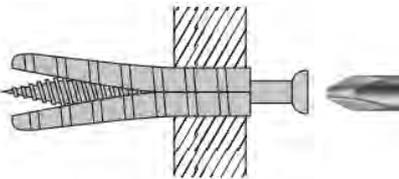

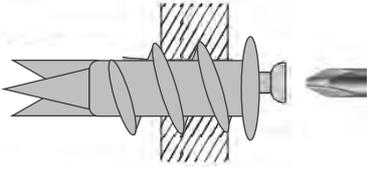

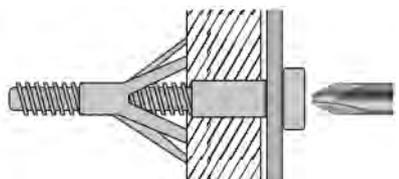

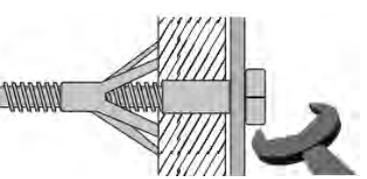

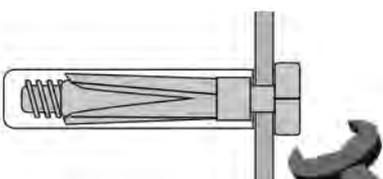

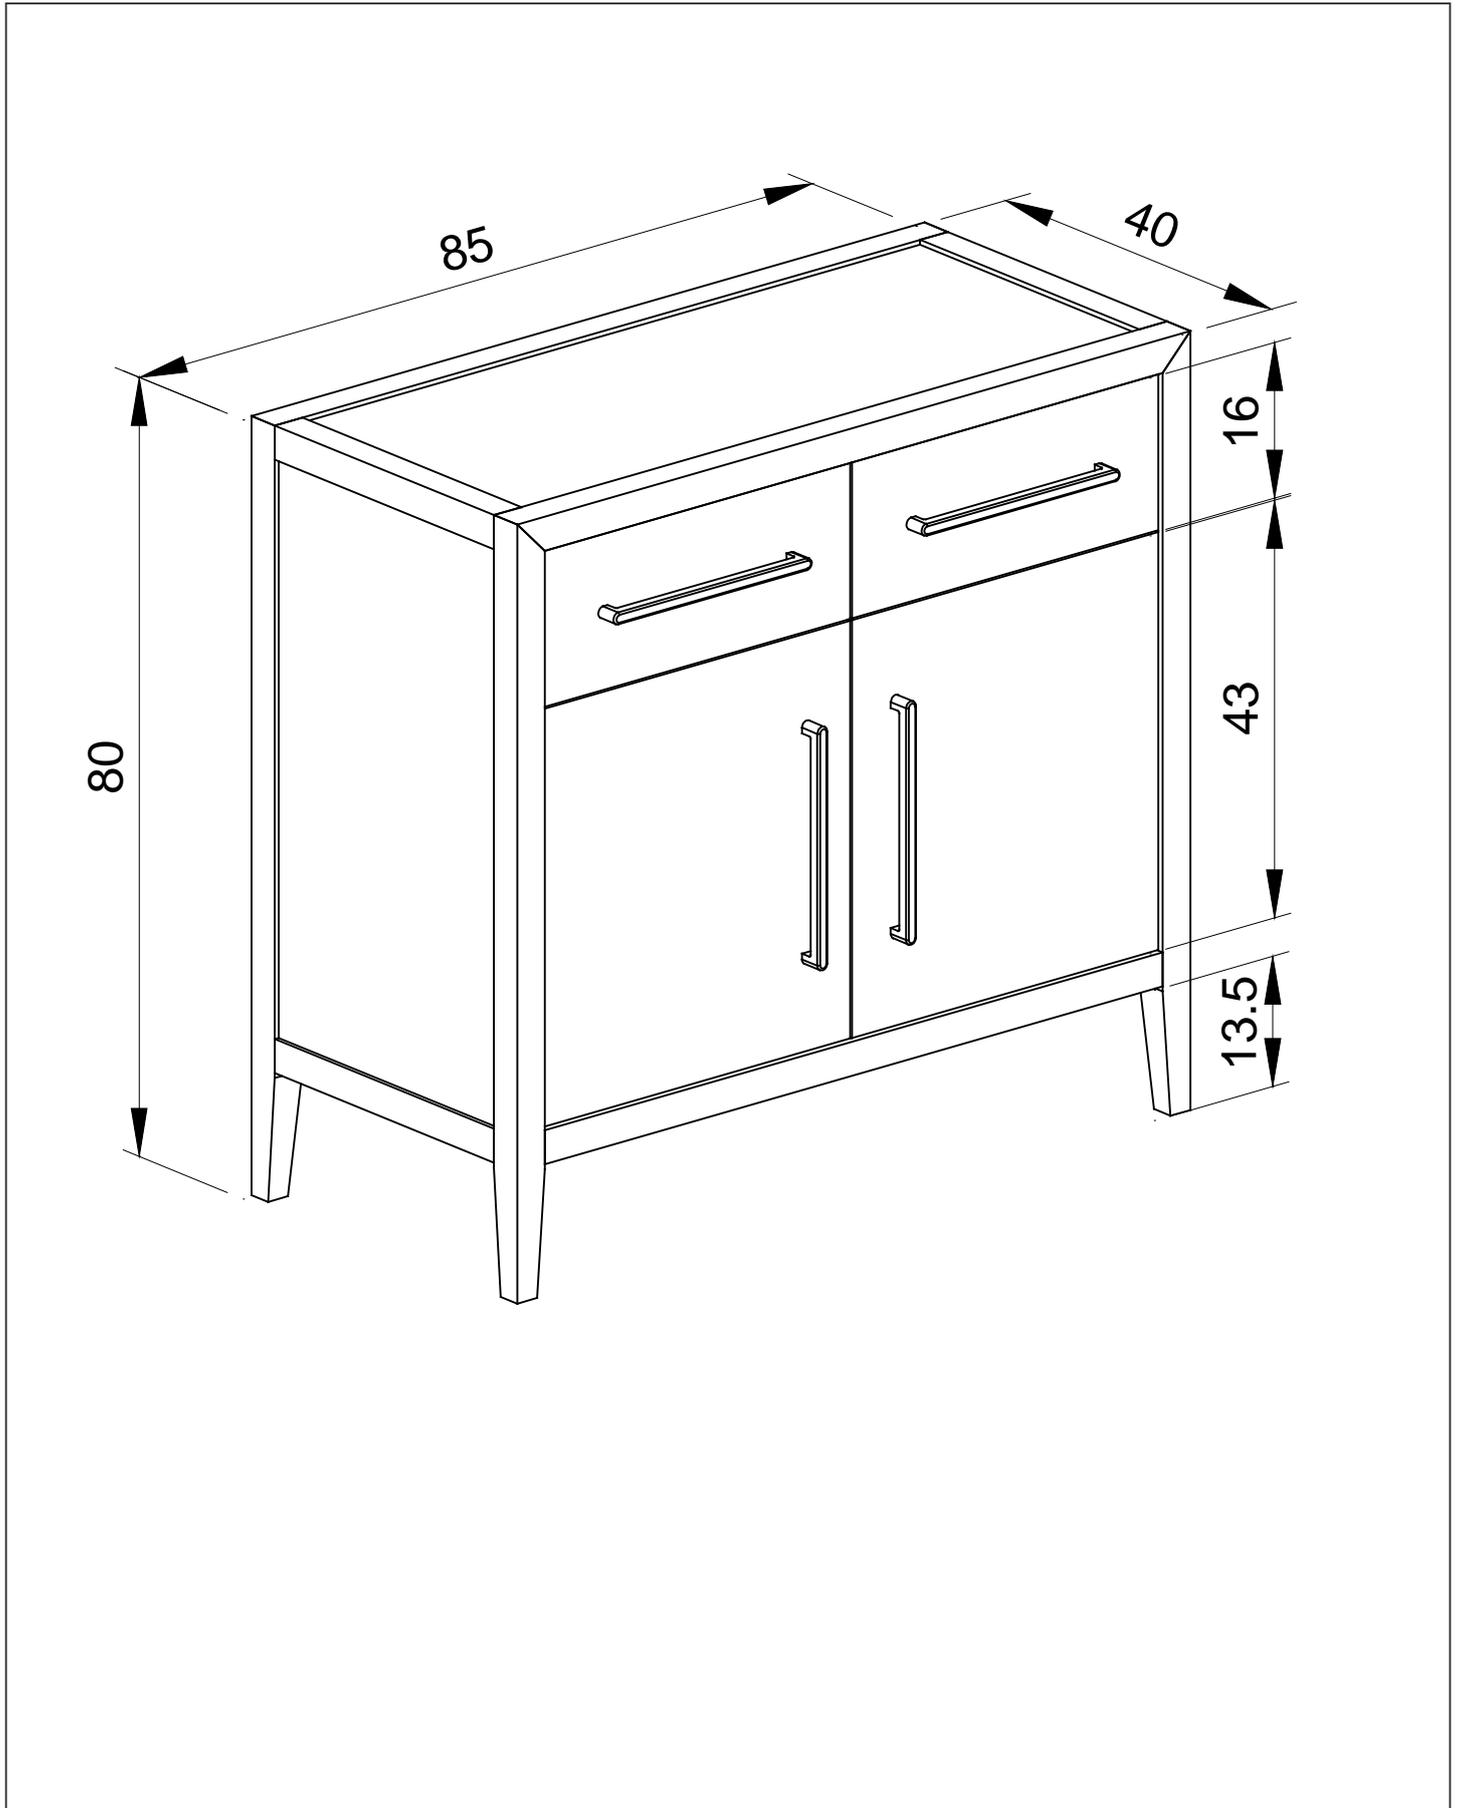

If you are unsure of the below guidance, consult a qualified tradesperson for advice or help.

- Wall fixings are not provided with this product as different wall types require different screws and wall plugs. See table below as a guide only.
- Always use a wall plug, as screws alone will not be secure into walls.
- As a general rule, always use a larger screw and wall plug if you are not sure.
- When drilling into walls always check there are no hidden wires or pipes.
- Make sure that the screws and wall plugs are suitable for supporting the weight of the product.
- Ensure you use the recommended drill bit to match the required hole size for the wall plug. Wall plugs must fit tightly into the drilled hole.
- Ensure you drill the hole horizontally, do not force the drill or enlarge the hole.
- Take extra care when drilling high walls.
- Ensure the plug is fitted below the ceramic tile to avoid splitting or cracking

Care and Maintenance.

- Regularly check the fixings to ensure the wall plug or screws have not become loose. Tighten or stop using the product if they have.

Wall plug types		
You can use one of the following types of wall plug if your walls are made of brick, breeze block, concrete, stone, wood or plastic board.		
General Purpose	Plasterboard	Hammer
		
For light loads only. Options available for most wall types.	For light loads only. Attach into plasterboard.	For light loads only. For solid walls covered with plasterboard. Allows the fixing to be attached into brick behind.
