Dining Chair

Assembly & Care Instructions

www.dunelm.com

- Uneven floors could give the impression that doors are out of alignment or that the furniture is wobbly. Be aware of this and compensate, if necessary, by adjusting the hinges or packing a corner to level the item. Please refer to the assembly instructions and adjust accordingly.
- If your furniture becomes stained, scratched, chipped or suffers other damage, we recommend professional help is sought to restore it. Please contact our customer services line for recommended agents.
- **DO** move items such as ornaments or coasters around periodically to allow the colour to mellow evenly.
- **DO** use mats and coasters to protect the surface from heat, liquids, or items that may cause scratches.
- **DO** ensure plastic or felt feet protectors are securely fitted into place on the feet and legs to avoid scratches.
- **DO** check fittings and fixings from time-to-time and tighten when necessary. Stop using the product if still unstable after all screws and bolts are tightened.
- **DO NOT** drag your furniture when moving it as this can damage joints. Always lift furniture into place.

Foil Care

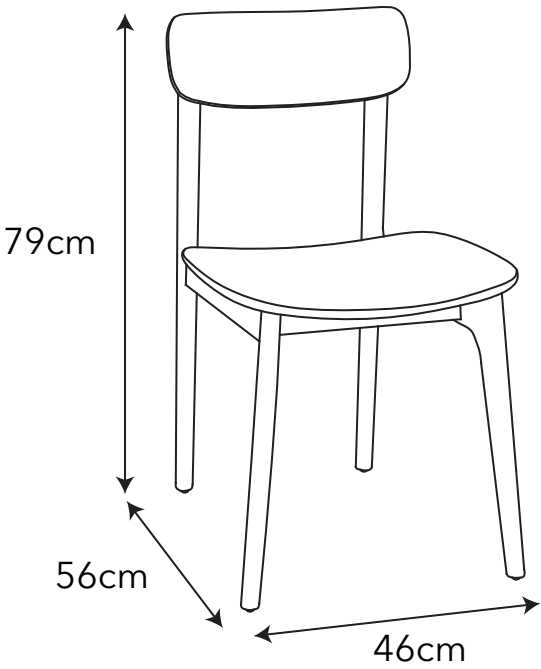

- **DO** avoid water or other liquids contacting scratches or chips as this can cause the surface to bubble and lift.
- **DO** only clean using a damp cloth and mild detergent. Aim to dust weekly with a soft, lint-free cloth or duster to prevent any build up of dirt.
- **DO** remove any spills immediately to avoid staining.
- **DO NOT** place directly in front of heat sources such as radiators or fires as timber can be affected by temperature and humidity which may cause cracking and warping.
- **DO NOT** in direct sunlight, as this will cause the colour to change quickly.
- **DO NOT** use bleach or abrasive cleaners.
- **DO NOT** use too much water when cleaning, the cloth should just be slightly damp.
- **DO NOT** use abrasive polish or silicon-based polishes as these can affect the finish over time.

Marble Care

- As a soft stone, marble can be susceptible to chips, cracks, scratches, and discoloration, so it's important to care for it properly.
- **DO** clean with a damp cloth using warm water or a specialist marble cleaner, then buff to dry.
- **DO** remember that marble surfaces are porous, so it's crucial to remove spillages immediately to avoid stains, and we recommend using coasters and place mats to protect against heat and moisture.
- **DO NOT** use abrasive or acidic cleaners, chemicals and regular furniture polishes on marble as they can cause damage.
- **DO NOT** let acidic substances come directly into contact with the marble, for example lemon juice.
- **DO NOT** use marble surfaces as a chopping board or work top and do not place heavy weights on it.
- **DO NOT** sit or stand on a marble surface.

Timber Care

- Timber is a natural material and each piece is individual.
- Colour may mellow over time and new items can vary in shade from items that you have purchased previously.
- **DO** only clean using a damp cloth and mild detergent. Aim to dust weekly with a soft, lint-free cloth or duster to prevent any build up of dirt.
- **DO** ensure the polish you are using is correct for your product and finish.
- **DO** avoid getting furniture wet when mopping floors. Always move out of the way when possible.
- **DO** patch test polishes or cleaning products on a small discreet area before applying across the whole unit.
- **DO** remove any spills immediately to avoid staining.
- **DO NOT** place directly in front of heat sources such as radiators or fires as timber can be affected by temperature and humidity which may cause cracking and warping.
- **DO NOT** place timber product in direct sunlight, as this will cause the colour to change quickly.
- **DO NOT** use bleach or abrasive cleaners.
- **DO NOT** use abrasive polish or silicon-based polishes as these can affect the finish over time.
