

Thank you for purchasing this light fitting. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please keep these instructions for future reference.

Warnings!

This is a Class II product and must NOT be earthed. This product is suitable for indoor use only and is not suitable for a bathroom or outdoor location. Please read these instructions carefully before commencing any work. Your lamp has been packaged as separate parts to prevent damage during transit. When manoeuvring or assembling this product, it must be lifted from the bottom section. Under no circumstances must this floor lamp be covered with any material as this could pose a safety hazard. It must be used on a stable, flat surface. The lamp must be protected by a 3 amp fuse in the mains plug. If you are in any doubt, please consult a qualified electrician. For your safety, always switch off the supply before cleaning or changing the bulb. If the mains cable becomes damaged it must only be replaced by a technically competent, qualified person. Always use correct type and wattage bulb. Never exceed the wattage stated. This product contains delicate parts – be careful during handling and maintenance to avoid breakage.

Do not attempt to plug in or use this product until it has been fully assembled. Disconnect from mains during assembly or maintenance.

Step 1

Carefully remove all packaging from the base section, central tubes, top section and shade and place on a stable, flat surface.

Step 2

Screw tube (1) onto the lampholder section in a clockwise direction. Take care not to trap the cable or cross the thread. Then screw tube (2) onto tube (1) in the same way.

Step 3

Lay the product down and gently pull any excess cable through from the bottom tube and then out through the side of the base. Turn the completed assembly anticlockwise approximately 6 times. (Turning the tubes anticlockwise first ensures that the cable will straighten when the tubes are fully assembled).

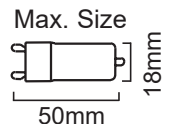

Step 4

Screw the stem into the base (3) and fit the base pad (4). Stand the product upright and check the tightness of the joints.

Step 5

Fit the bulb (5). Max. 5W LED G9. Please refer to the diagram for maximum bulb size to fit in the product.

NOTE: Never fit bulbs of a higher wattage than those specified on the label (as this may cause overheating and damage the fitting).

Step 6

Place the metal disc (6) over the lampholder and fit the shade (7) by screwing onto the threaded lampholder in a clockwise direction. Take care not to cross the thread. Tighten with light pressure.

Step 7

Your floor lamp is now ready to use. Switch on using the foot switch.

Please note: The top section can be adjusted up and down by loosening the adjustment handle (8) on the side. Take care to hold the arm when adjusting the position as the shade may suddenly drop.

The shade position can also be adjusted by loosening the thumb screw in the join of the shade and arm (9).

If your lamp will not illuminate, please check the bulb, the 3 amp fuse in the plug and ultimately check the relevant fuse in your fuse box. If unsuccessful please contact our customer service team.

Care and cleaning

Finish - We recommend cleaning with a soft dry cloth. Do not use abrasive materials as these will damage the finish.

Glass parts - Remove and wash in warm water or just use a damp cloth. Do not use abrasive materials as these will damage the finish. Take care when handling glass parts to avoid damage or injury.

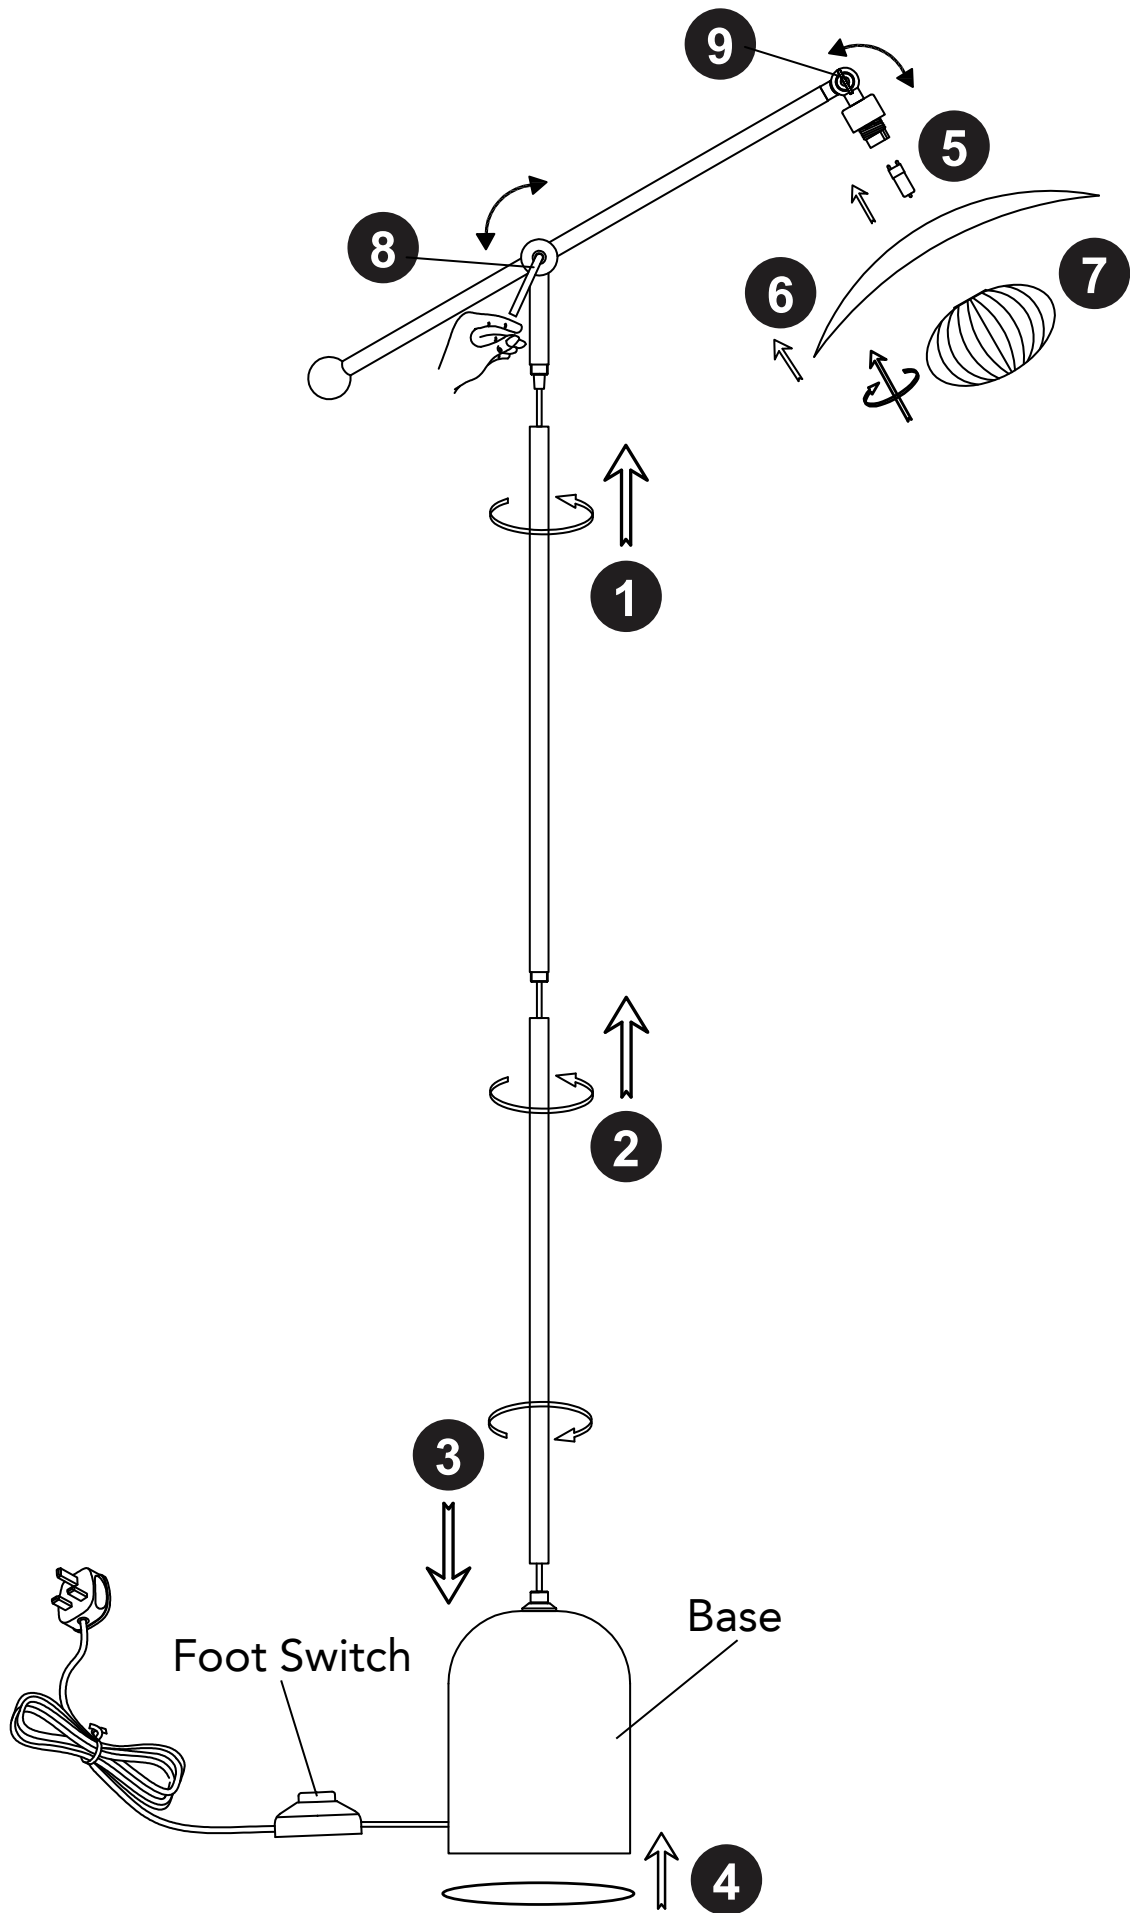

Our packaging is recyclable, please recycle where facilities exist.

Waste electrical products should not be disposed of with household waste.

Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

■ We're happy to recycle your old light for free. Simply bring it to store within 28 days of purchase of your new light, with your receipt, and we'll make sure your old light stays out of landfill.
