

Thank you for purchasing this light fitting. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please keep these instructions for future reference.

## **Warnings!**

This is a Class I product. This fitting must be connected to Earth. The terminal blocks are supplied according to requirements of the fitting.

This product is only suitable for connection to a 240V~50Hz supply in accordance with current IEE wiring regulations. It should be installed in accordance with local building regulations.

This product is IP44 rated and is suitable for outdoor use.

Before installing your light fitting always switch off the mains supply and remove the appropriate fuse or switch off the appropriate circuit breaker before commencing installation.

If replacing an existing fitting, make a careful note of the connections.

This product is suitable for installation on surfaces with normal flammability e.g. wood, masonry. It is not suitable for use on highly flammable surfaces or in flammable atmospheres.

Never fit bulbs of a higher wattage than those specified on the label, as these may cause overheating and damage the fitting.

If you are in any doubt about your competence please consult a qualified electrician.

If any modification is made it will invalidate the warranty and may render the product unsafe.

Keep children and animals away from the assembly area. This fitting contains small parts that could cause choking if swallowed. Keep all plastic wrapping materials away from children to avoid danger of suffocation.

Ensure that all packaging is disposed of carefully and responsibly.

## **Fixing Instructions**

Make sure you have the following items which are required to install this light fitting:

Small electrical screwdriver, cross head screwdriver & insulation tape.

### **Step 1**

Decide on the position of the light fitting or remove existing light fitting. Note the position of the electrical connections, and ensure there is a solid mounting surface, preferably a wooden joist or joist bridge to support the weight of the light fitting.

### **Step 2**

Remove the ceiling cup **(1)** from the product by undoing the 3 side screws **(2)** and retain for reuse. Use the ceiling cup as a template to mark the screw holes. Drill holes and fit supplied wall plugs **(3)** (suitable for masonry only - for other surfaces use appropriate fixings). Take care not to damage any wiring or pipes when drilling the holes.

### **Step 3**

Carefully pierce a small hole in the rubber grommet **(4)** in the centre of the ceiling cup to allow the cable to pass through. Feed the incoming mains supply cable through the grommet entry hole. This will act as a water ingress guard. Secure to the ceiling using the supplied screws **(5)**.

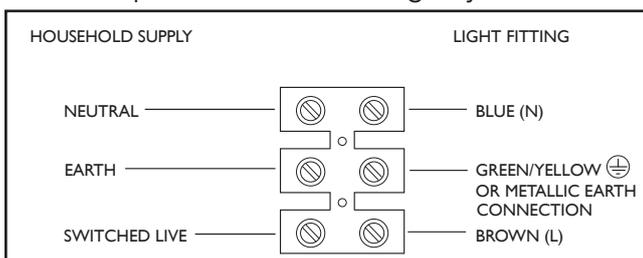

### **Step 4**

The hanging height of this product can be adjusted. Unscrew the carabiner **(6)** on the bottom chain link and refit to achieve the desired drop. Re-tighten to secure and then remove excess chain links with 2 pairs of pliers.

Loosen the screw under the ceiling cover **(7)**. Push the cable up into the ceiling cover, whilst at the same time feeding the cable out from the top of the ceiling cover. When the desired height is achieved re-tighten the screw. Always ensure the weight of the product is supported by the chain and not the cable. **Please note:** Do not loosen the screw to the screw clamp inside the ceiling cup as this is a securing the cable into the terminal block.

### **Step 5**

Having identified the household wiring from your existing light fitting, connect to the connection block **(8)** inside the product in the following way:

### **Check that...**

You have correctly identified the house wires.

The connections are tight.

No loose strands have been left out of the connection block.

### **Step 6**

Refit the product onto the ceiling cup and tighten the screws to secure. Take care not to trap any wiring.

## Step 7

Remove the three small screws (12) from the product and detach the shade (11).

## Step 8

Fit the bulb (9).

Max 10W LED E27 GLS.

Only use glass bulbs to ensure optimum moisture resistance.

**NOTE: Never fit bulbs of a higher wattage than those specified on the label (as these may cause overheating and damage the fitting).** Ensure the bulb seal (10) is securely in place on the lampholder cup. This is essential to ensure the product remains waterproof.

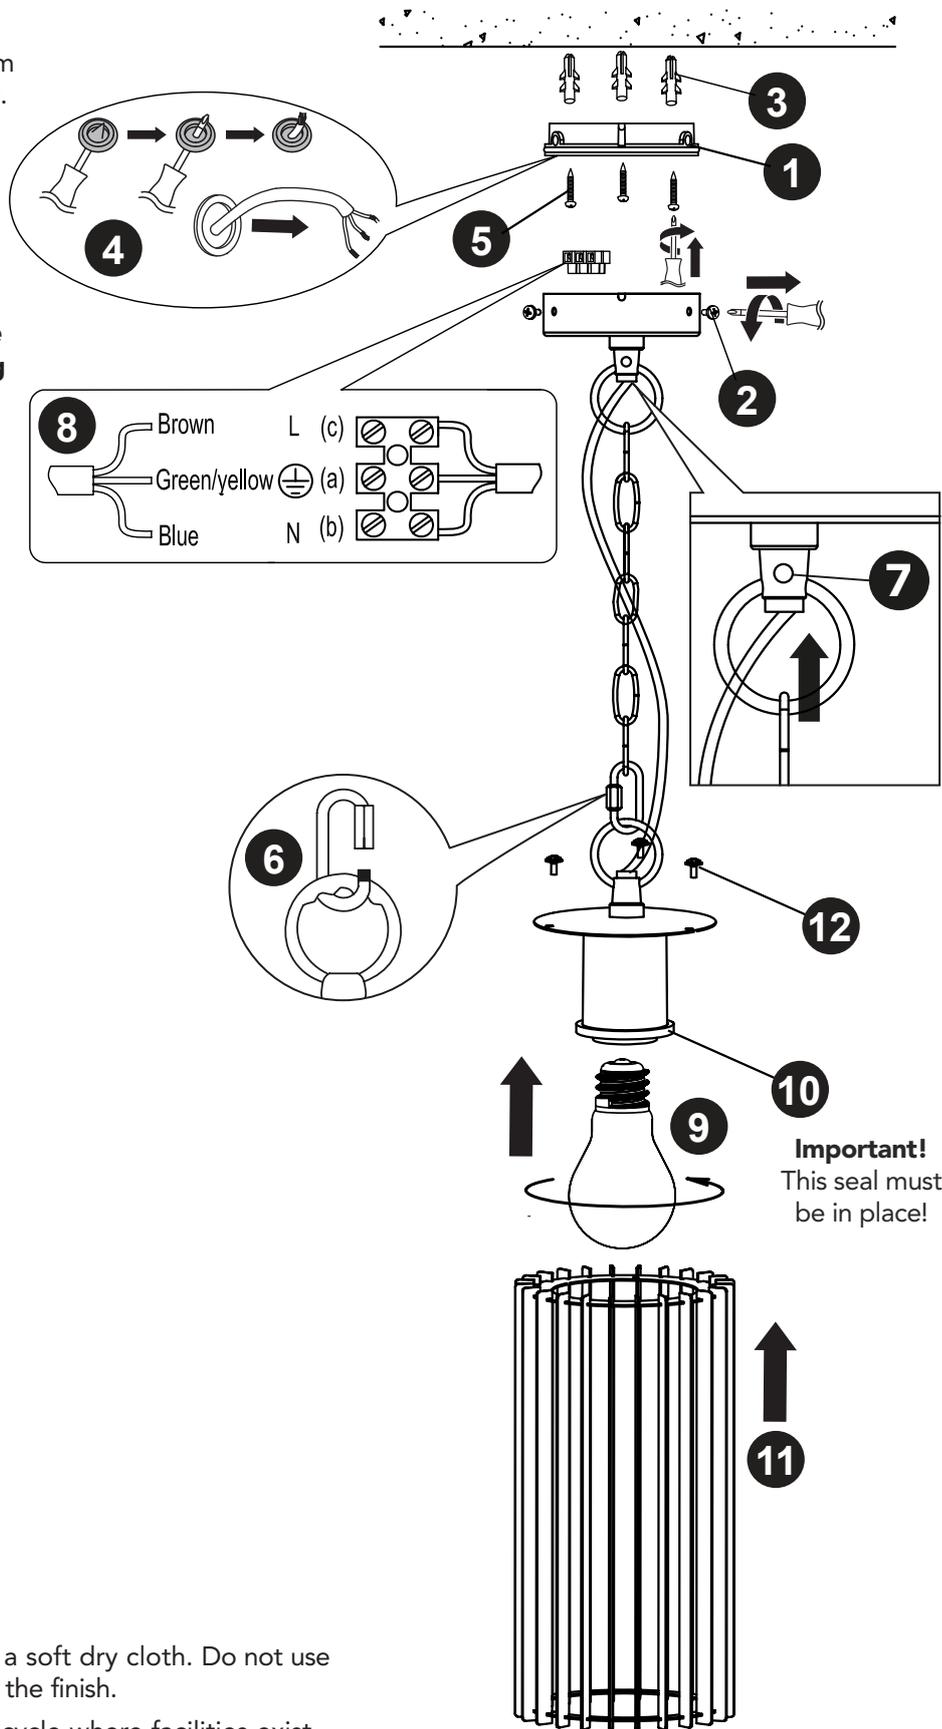

## Step 9

Refit the shade (11) using the small screws (12) removed in step 7.

Tighten to secure but be careful not to overtighten.

## Step 10

Turn on the power and test.

## Care and cleaning

Finish - We recommend cleaning with a soft dry cloth. Do not use abrasive materials as these will damage the finish.

Our packaging is recyclable, please recycle where facilities exist.

 Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

**— We're happy to recycle your old light for free. Simply bring it to store within 28 days of purchase of your new light, with your receipt, and we'll make sure your old light stays out of landfill.**
